1914

The Wilde family founded a dental factory named Wilde in the Rheingau region of Germany. In the 60s more than 500 people were working on synthetic prosthetics. Based on this knowledge the idea for the foundation of Wilde Cosmetics was born.
The light-curing resins were used to extend and strengthen fingernails. This was the birth of “Light Concept Nails” which during the following years was cut short into the brand name “LCN”.

Today

You – our client – are the measure of all things. Your needs are always at the focus of our attention and our actions. This is the foundation of a cooperative relationship.
In doing so we do not see ourselves merely as a manufacturer and seller. We offer comprehensive and on-going training options for all product areas and applications. Our employees are highly motivated as well as competend and reliable persons of contact.

Urea 10% Express Foot Spray

Urea 10% Express Care Foot Spray is ideal for the quick care in between or to finish off a treatment. Due to the moisturizing ingredients such as 10% urea, saccharides isomerates, provitamin B5 and allantoin the skin immediately becomes soft and noticeably supple. The carbohydrate mixture saccaride isomerate is an imitation of the human carbohydrate fraction in the skin and increases the water-binding capacity – even of very dry skin. Jojoba oil possesses an extremely high skin compatibility.

MICRODERMABRASION

Microdermabrasion is a very effective and extremely gentle treatment method for a highly effective regeneration and rejuvenation of the facial skin as well as the skin on the body. The formation of new, fresh skin cells is promoted, due to the gentle removal of dead skin cells.

Elite Diamond 3 in1

The LCN Elite Diamond 3in1 represents a micro dermabrasion unit without crystals and combines 3 functions in one unit: Diamond micro dermabrasion, Ultrasound and a warm/cold function. The diamond grinding heads are available in various sizes and grits. The ultrasound function with 2 sound heads makes it possible to treat on the spot or larger areas.
The warm/cold function can be optimally integrated into every cosmetic treatment. The cold function calms and cools irritated skin after microdermabrasion. The warm treatment is soothing, invigorates the circulation and relaxes the skin.

The unit contains: 3 hand pieces, 9 diamond grinding bits, 2 ultrasound heads and warm/cold function

Technical data:
Power consumption: 110W
Measurements: 118x47x52 cm

MESOPORATION

The Mesoporation treatment supports the skin rejuvenation process, Cellulite treatments and the breakdown of fatty deposits. By means of an electrical field microscopically small channels are being generated through the upper layer of the skin and the cells in the underlying tissue. Thru these newly build channels, which will close again after the treatment, cosmetic and pharmaceutical ingredients can be transported into the skin and tissue in high concentrations like an injection - completely without needles and injections.

permanent make-up

UNITS & MODULES

LCN's product range offers a variety of pigmentation units - this way you can perform your Permanent Make-up treatments individually and according to your clients needs.

Kryo-Liner 2

The Kryo-Liner 2 is an advanced development of the Kryo-Liner. This unit convinces with its simple handling via touchscreen. The innovative and patented SensiDrive function measures the skins resistance and it can in addition to the extension of the needle and the hub frequency adjust the power of penetration. The module recognition function makes it possible to show the needle configuration on the display and therefore makes a precise workflow easier. In addition types of treatments (eyebrow, lips, eyelid, etc.) can be pre-set.
A timer function guarantees an exact overview of the duration of the treatment. The handpiece offers a lot of advantages as well. Length and weight of the handpiece have been reduced by 30%. In addition the lower vibration of the handpiece allows an even steadier workflow and the longer modules protect from contamination. The Kryo-Liner 2 also offers an easy handling of software updates. The unit consists of a control unit, foot pedal, pigmenting handpiece, Kryo handpiece with a cooling applicator, wall plug, as well as a #1, #3 and #5 hygiene module.

Titanium2

The intuitively operated, modern design base station provides total precision thanks to its electronic controls. The individually adjustable needle stroke (50-150 strokes per second) guarantees mildly invasive pigmentation with a low selected penetration depth in order to provide an aesthetically convincing make-up result with optimal permanency. The two handpiece connections are designed for the use of different colours and needle configurations. The light and compact Titanium2 is extremely silent and produces only slight vibrations. The unit includes a controller, handpiece, foot pedal, power cord, pen holder, high-quality case for mobility, as well as hygiene modules #1, #3 and #5. Made in Germany in accordance to the highest quality standards.

CLASSIC file unit

LCN CLASSIC file unit - in the blink of an eye, the perfect finish for your customers finger- and toe nails. By turning the left controller either to the left or to the right the desired rotation direction as well as the rotation speed is selected. Suction power can be adjusted with the right controller. A sufficient suction power can already be reached with a setting at "12 o'clock" due to a Eco-Setting which supplies adequate suction while at the same time keeping the noise at an acceptable level. The electrical connection is ingetrated into the connection for the suction hose for easier handling. The comfortable quick chuck mechanism allows a change of drill bits without twisting of the hand piece. Includes practical slots for your LCN drill bits on the top.
